THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The average daily production of all types of tubes has been raised to 50,000.
2. The factory is now working three shifts, with some divisions working overtime, so that the so-called T-2 program quota can be completed by 15 December. The T-2 program operates on the following tube types: P 50, 6 AC 7, 6 SA 7, 6 J 5, 6 AG 7, 6 SH 7, 6 SK 7, 6 SJ 7. Practically all the T-2 program tubes go to the Soviet Union.
3. The reconstructed 6 SH 7 with the oval grid has given good results.
4. The daily quota of P 50 tubes has been raised to 1,500. Since mica is continually more difficult to obtain, research is being undertaken on making the P 50 tube out of ceramic material.
5. It has long been obvious that production could be raised, if the grid-winding and glass units could work faster. However, the necessary machines are lacking, particularly smelters.]
6. A Russian truck [] comes to the factory frequently to take away tubes.
